

## Clearing the Cache in Chrome

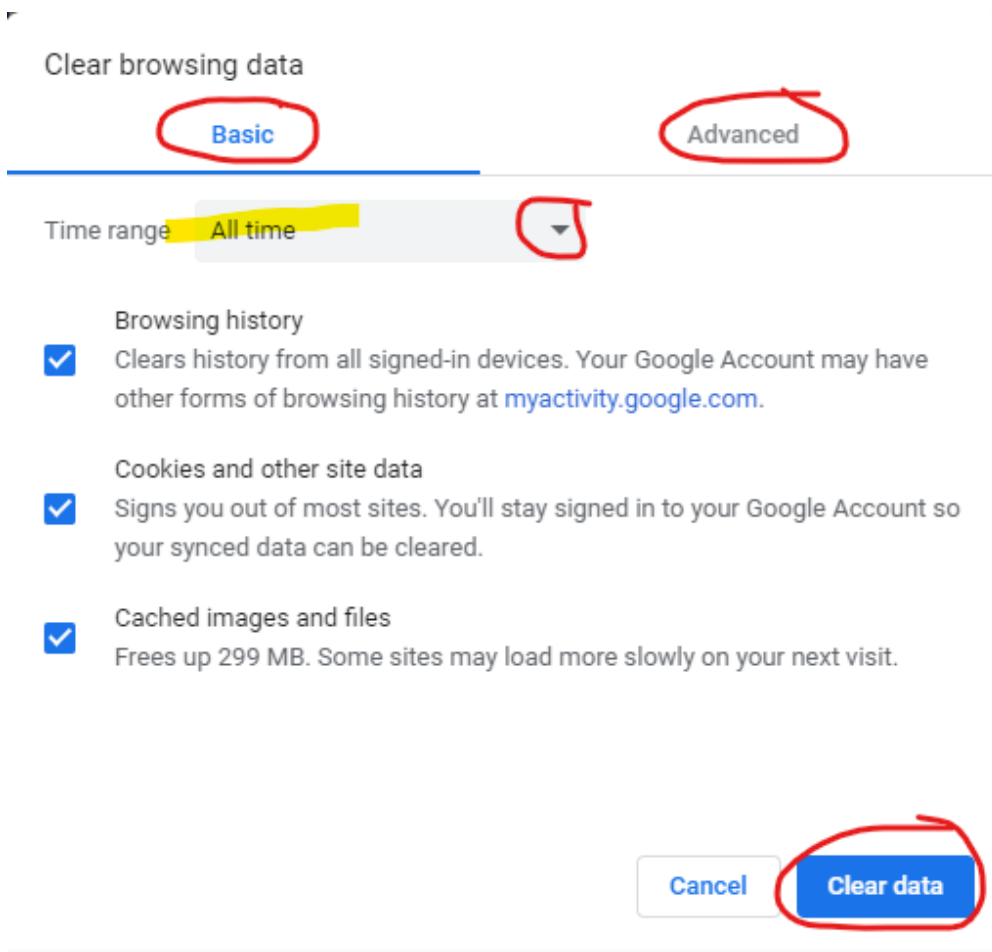

Open Chrome and type in the following address: `chrome://settings`

Scroll down to the Privacy and Security section and click on “Clear browsing data”:

Start in the “Basic” tab and change the Time range to “All time” then check every box that isn’t grayed out.

Switch to the “Advanced” tab and do the same thing... then click on “Clear data”:

Close the Chrome browser and RESTART the laptop/computer.
